Air Traffic Management

Harris Corporation is a leading technology innovator, solving customers' toughest mission-critical challenges by providing solutions that connect, inform and protect. Harris supports government and commercial customers around the world. Learn more at [harris.com](https://www.harris.com).

In Australia, Harris has a diverse, broad-based capabilities set that include sales, research and development, engineering, manufacturing, sustainment and comprehensive support services.

Harris is a proud designer and supplier of tactical communications technology and engineering services for the long-term modernization programs of Australia's Department of Defence.

Harris has served government and commercial customers across Australia for more than 25 years. Today, Harris has four facilities in three major cities – including a 10,000 square-meter Logistic Centre – and employs about 240 professionals who understand the unique needs and challenges of customers in the region.

ADVANCED SOLUTIONS FOR AUSTRALIAN CUSTOMERS

DEFENCE SOLUTIONS

Harris is the leading supplier of tactical radio communications systems for Australia's military forces. Under the Land 200 contract, Harris is developing and delivering the tactical communications network for the Australian Defence Force into the next decade. This includes providing the battle-proven Falcon® radio family.

Harris Night Vision and Integrated Soldier systems – with augmented reality and network integration – provide the warfighter with unrivaled situational awareness and an edge in combat. These systems enable heads-up operations and deliver fully networked, shared situational awareness, from sensor to commander.

Harris is a key electronic warfare partner to the Australian Defence Force across maritime, land and air domains. Harris electronic support measure solutions protect key platforms of the Royal Australian Navy and Royal Australian Air Force, while Harris force protection electronic counter measures protect the Australian Army.

The Harris office in Melbourne, Australia, is the technology centre for the company's C4I business and the SwitchplusIP® product, which provides interoperable communications in applications from tactical environments to large, fixed-site national command and control centres.

Customers are also turning to Harris for integrated, multispectral situational awareness solutions that blend radars, sonars and sensors to help defeat current and emerging threats along maritime borders.

- C4I Systems, Tactical Radios, Night Vision Equipment
- Electronic Warfare Systems
- Undersea Systems, Radars
- Border Security Systems
- Intelligence, Surveillance and Reconnaissance Systems

GEOSPATIAL SOLUTIONS

Harris provides geospatially-based analytics, insights, and answers with automated tools that make sense of geospatial data overloads. As the leader in image science, Harris' scientifically-proven ENVI® analytics software can be used to extract actionable information from geospatial data while our custom data solutions are developed to meet mission-specific requirements. Harris' Geiger-mode LiDAR sensor collects high-resolution data faster and more cost effectively than traditional sensors.

- Nationwide Mapping (LiDAR)
- Geospatial Analytics
- Custom Geospatial Software Solutions

WEATHER AND ENVIRONMENTAL SENSING

Harris designs advanced technologies that capture, analyze and visualize data from every altitude to improve understanding of weather and climate, and enhance Earth observation. Harris electro-optical payloads and sensors are on multiple next-generation weather systems, including Japan's Himawari weather satellites.

- Spaceborne Weather and Climate Sensors and Payloads
- Ground Processing and Distribution
- Weather Data Analytics

AIR TRAFFIC MANAGEMENT

Harris' solutions connect systems and operations across regions to provide secure, scalable air traffic growth. They improve communications, reduce carbon emissions and increase situational awareness.

Harris Air Traffic Management Technology integrates all voice communications and alarm and telemetry monitoring for the Aviation Rescue Fire Fighting station at Newman Airport in Australia.

- Telecommunications Infrastructure and Services
- Voice Communication Systems
- System Wide Information Management
- Airport and Airline Operations Management

LOCATIONS

Harris facilities in Australia support program execution, system and vehicular integration, as well as training, maintenance, logistic services, business development and government relations.
