

# With the Ability to Communicate on Four Different Bands Why Look Anywhere Else?

The Unity Multiband Radio is the Only Device on the Market that Meets All Your Operational and Interoperability Needs.

# Unity<sup>®</sup>

Unity is There

When the **UNITED STATES COAST GUARD** protects the water and coastline that surrounds our nation, Unity is there.

When the **UNITED STATES MARINE CORPS** communicates with local first responders around the world, Unity is there.

When **WASHINGTON, D.C.'s FIRST RESPONDERS** from dozens of agencies converge on a major incident, Unity is there.

When more than 160 agencies respond to **SUPERSTORM SANDY** creating a vital need for communications and situational awareness, Unity is there.

When the **UNITED STATES CUSTOMS & BORDER PROTECTION** agency coordinates across boundaries with state, local and federal partners, the Unity XG-100 Full-spectrum Multiband portable radio is there.

## Arm Yourself with Unparalleled Interoperability

The Unity portable radio connects multiple jurisdictions and agencies across various frequencies, systems, and borders.

The Unity XG-100P Full-Spectrum Multiband radio's user-centric design delivers interoperability, ease of use and advanced capabilities, all in one sturdy and reliable radio. Not only does the Unity have access to both digital APCO P25 secure and analog FM communications across

VHF, UHF and 700/800 MHz bands, it also continuously scans across all bands, voice modes and encryption types at the same time. Underscoring the importance of multiband radio capabilities, the Department of Homeland Security's Science and Technology Directorate recently conducted a pilot test of more than 100 multiband radios with 15 first responder agencies at large events throughout the United States. The DHS found that multiband radios greatly improved the communication and coordination of responders by eliminating the need for agents to carry multiple radios, share communication resources, relay transmissions through dispatch, use radio patching systems and hand deliver messages. The Unity XG-100P Full-Spectrum Multiband Radio was among the top-performers in the program, achieving excellence in all categories.

Finally, agents can communicate with counterparts on both sides of the border without having to carry two, three or even four radios to safeguard the American homeland.

BENEFIT	FEATURE
Broadest Scale of Interoperability on the Market	Operates on VHF, UHF, 700/800 MHz Frequency bands
Clear Superior Audio Quality	AMBE+2 Vocoder and Noise-Cancellation Technology
Secure Communications	AES/DES-OFB Encryption
Rugged Construction for Reliability and Endurance	MIL-STD-810G Standard-Approved for Durability and Immersion
Clean and Easy to Learn Touchscreen	Full Color Front Display Interface
GPS Assistance as Needed	Advanced Situational Awareness
