Air Traffic Management

Weather and Environmental Sensing

Geospatial

Harris Corporation is a leading technology innovator, solving customers' toughest mission-critical challenges by providing solutions that connect, inform and protect. Harris supports government and commercial customers around the world. Learn more at harris.com.

The culturally and economically diverse Asia Pacific region shares many common challenges. These include securing thousands of miles of vulnerable coastline and borders, guarding against threats to safety and security, and developing the infrastructure essential for continued economic growth. Helping customers meet these needs is the mission of Harris Corporation's Asia Pacific (APAC) business.

With about 240 employees, 11 locations, and regional headquarters in Singapore, the company's APAC operations are easily accessible and available, forming the hub for Harris' expanding business in the region. These locations are managed and staffed by local individuals who have a comprehensive understanding of the unique needs and challenges of customers in the region.

ADVANCED HARRIS SOLUTIONS FOR ASIA PACIFIC CUSTOMERS

Harris delivers high-value solutions across APAC with diverse, broad-based capabilities including sales, research and development, engineering, manufacturing, sustainment and comprehensive support services. The company is committed to operational and customer excellence as an integral part of its business strategy.

DEFENCE/MILITARY

- Army, Air Force, Navy and Marine Corps
- Maritime Domain Awareness
- Special Forces, Border and Port Security

CIVIL/NON-MILITARY

- Air Navigation Service Providers (ANSPs)
- Airlines and Airports
- Police, Fire and Rescue Transportation
- Space Agencies

HARRIS FACILITIES IN ASIA PACIFIC

- Singapore, Philippines, Malaysia
- Australia
- Japan
- Taiwan
- Hong Kong
- India

DEFENCE SOLUTIONS

Harris' Falcon® tactical radios deliver secure communications and create a foundation for high-performance, networked systems that address command and control, border security, counter-terrorism, disaster relief, narcotics interdiction, maritime domain awareness and other applications. Night vision devices integrated with radios and tactical networks enable soldiers to receive texts, alerts or images directly into the goggle's display while allowing commanders to see what soldiers see. Customers also are turning to Harris for integrated, multi-spectral situational awareness solutions that blend radars, sonars and sensors to help defeat current and emerging threats along maritime borders.

The company's range of advanced, defence-related products and systems includes:

- C4I Systems, Tactical Radios
- Night Vision Equipment
- Undersea Systems
- Radar
- Electronic Warfare Systems
- ISR Systems
- Suspension and Release Systems
- Tactical Air Traffic Management
- Robotics

PUBLIC SAFETY AND PROFESSIONAL COMMUNICATIONS

Harris' trusted communications for first responders include radios, dispatch systems, network switching and management, and station and site equipment.

AIR TRAFFIC MANAGEMENT

Harris' solutions connect systems and operations across regions to provide secure, scalable air traffic growth. They improve communications, increase capacity, reduce carbon emissions and enhance situational awareness.

- Telecommunications Infrastructure and Services
- Voice Communication Systems
- System Wide Information Management
- Air Traffic Optimization and Airport Operations Management

WEATHER AND ENVIRONMENTAL SENSING

Harris designs advanced technologies that capture, analyze and visualize data from every altitude to improve understanding of weather and climate and enhance Earth observation. Harris electro-optical payloads and sensors are on next-generation weather systems such as Japan's Himawari weather satellites.

- Spaceborne Weather and Climate Sensors and Payloads
- Ground Processing and Distribution
- Weather Data Analytics

GEOSPATIAL SOLUTIONS

Harris provides geospatially-based analytics, insights and answers with automated tools that make sense of geospatial data overloads. Harris' Geiger-mode LiDAR sensor collects high-resolution data faster and more cost effectively than traditional sensors.

- Geospatial Analytics – ENVI®, SARscape®, IDL®
- Custom Geospatial Software Solutions
- Nationwide Mapping (LiDAR)
