SERVING CUSTOMERS IN THE REGION
FOR MORE THAN 50 YEARS

SOLUTIONS FOR THE MIDDLE EAST

Defence

Public Safety & Professional
Communications

Geospatial Solutions

Air Traffic Management

Energy Solutions

Weather and Environmental Sensing

Harris Corporation is a leading technology innovator, solving customers' toughest mission-critical challenges by providing solutions that connect, inform and protect. Harris supports government and commercial customers around the world. Learn more at [harris.com](https://www.harris.com).

Harris operates in six locations across the Middle East, where it has provided products and services for more than 50 years.

The company's broad-based capabilities set in the region includes sales, engineering, training, and customer support. Our highly trained and dedicated employees understand the needs of customers in the region.

Longstanding partnerships reinforce the company's commitment to the region. Harris Atlas Systems, LLC – a joint venture between Harris Corp. and Atlas Telecom, a UAE-based technology leader – is at the forefront of delivering advanced capabilities for innovative intelligence solutions.

HARRIS INNOVATION IN THE MIDDLE EAST

DEFENCE

Harris is a global leader in command and control, integrated battlefield management and tactical communications, providing real-time collaboration across all echelons.

Harris' integrated battlefield management system provides the UAE military a cutting-edge, continuous operations platform for situational awareness and staff functions. Through a combination of sophisticated technology and high-value systems integration services, military users can effectively track hostile and friendly forces, develop and execute tactical operations and integrate personnel, intelligence, local weather, planning and other data into battlefield operations.

Harris tactical radios deliver reliable, secure communications to warfighters and are the foundation for high-performance, networked, wideband systems. The company's night vision devices easily integrate with radios and tactical networks, allowing soldiers to receive texts, alerts, video and graphics directly into their goggle's display – feeds that can also be shared real time with commanders.

Customers also turn to Harris for integrated, multifunction, software-enabled electromagnetic spectrum protection to defend their borders. The Advanced Integrated Defensive Electronic Warfare Suite (AIDEWS) protects the air forces of Oman,

Pakistan, Morocco and more. In addition, the Integrated Defensive Electronic Countermeasures (IDECM) will protect the air force of Kuwait in their F/A-18s.

- Electronic Support Measures (ESM) for surface and subsurface vessels
- Tactical Air Traffic Management and Precision Approach Radar Systems
- Intelligence, Surveillance and Reconnaissance Systems

PUBLIC SAFETY & PROFESSIONAL COMMUNICATIONS

Harris is a leading provider of trusted communications solutions for those who defend, protect and serve. Harris provides advanced IP voice and data networks; secure, next-generation public safety grade LTE solutions and applications for voice, video and data; and industry leading multiband, multimode radios, including P25 radios.

- Radios, Dispatch Systems/Consoles
- Network Switching and Management
- Station and Site Equipment

GEOSPATIAL SOLUTIONS

Harris provides geospatially-based analytics, insights, and answers with automated tools that make sense of geospatial data overloads. As the leader in image science, Harris' scientifically-proven ENVI® analytics software can be used to extract actionable information from geospatial data while our custom data solutions are developed to meet mission-specific requirements. Harris' Geiger-mode LiDAR sensor collects high-resolution data faster and more cost effectively than traditional sensors.

- Nationwide Mapping (LiDAR)
- Geospatial Analytics
- Custom Geospatial Software Solutions

AIR TRAFFIC MANAGEMENT

Harris' solutions connect systems and operations across regions to provide secure, scalable air traffic growth. They improve communications, reduce carbon emissions and increase situational awareness.

- Telecommunications Infrastructure and Services
- Voice Communication Systems
- System Wide Information Management
- Airport and Airline Operations Management

ENERGY

Harris' HeatWave™ radio frequency heating technology powers a patented process to efficiently extract heavy oil and bitumen. The process significantly reduces the need for water and operates at lower reservoir temperature and pressure.

WEATHER AND ENVIRONMENTAL SENSING

Harris designs advanced technologies that capture, analyze and visualize data from every altitude to improve understanding and prediction of weather and climate. Harris electro-optical sensors and payloads are on multiple next-generation weather systems.

- Spaceborne Weather and Climate Sensors and Payloads
- Ground Processing and Distribution
- Ground-based Greenhouse Gas Monitoring Systems
- Weather Data Analytics
