

# HARRIS CORPORATION IN THE UNITED KINGDOM

## SERVING CUSTOMERS IN THE UK FOR NEARLY 100 YEARS

Harris Corporation is a leading technology innovator, solving customers' toughest mission-critical challenges by providing solutions that connect, inform and protect. Harris supports government and commercial customers around the world. Learn more at [harris.com](http://harris.com).

### SOLUTIONS FOR THE UK

Tactical Radio Systems, Night Vision

Counter IED, Robotics

Electronic Warfare

Intelligence, Surveillance and  
Reconnaissance Systems

Stores Carriage & Release

Air Traffic Management

Geospatial Solutions

With five facilities and approximately 300 employees, the company's UK operations are the hub of Harris' expanding European business. Harris has diverse and broad-based capabilities in the UK, including sales, research and development, engineering, manufacturing, sustainment, repairs and comprehensive support services.

Harris is the proud designer, supplier and maintainer of all 50,000 tactical radios for the British armed forces in the Bowman tactical C4I system. In addition, Harris is partnered with UK industry for other advanced defence initiatives.

In 2016, Harris received the Innovation in Technology Award from the UK Trade &

Investment for contributions to the UK economy and our support for the UK Armed Forces. Harris is a proud member of the UK Forces Armed Covenant, Aerospace Defence Security Group and the Royal Aeronautical Society.

Another area of expertise for Harris is cutting-edge robotic solutions for austere and harsh environments. Beginning in 2018, Harris will supply 56 T7 multi-mission robots to the UK MOD as part of their Project STARTER. The T7s will be used to help defeat explosive threats, including improvised explosive devices (IED) and unexploded ordnances (UXO).

## DEFENCE

Harris offers a full range of advanced defence-related technologies including:

- Tactical Radio Systems
- Night Vision
- Counter IED, Robotics
- Electronic Warfare
- Stores Carriage and Release
- Intelligence, Surveillance and Reconnaissance Systems
- Undersea Systems, Radars

Harris is a leading designer and supplier of the UK Bowman tactical communication system, with more than 50,000 radios in service covering the HF, VPT, ADR+ and HCDR radio types. Harris' UK-based manufacturing, testing, and R&D capabilities are key to the Bowman partnership and to meeting critical communications needs for the UK and international customers. Harris is the #1 provider of Night Vision to the UK MOD and provides in-country support for over 44,000 goggles.

Harris provides comprehensive carriage, release and interfacing solutions to integrate weapons and stores onto all types of manned and unmanned air platforms. Harris supplied systems have been on almost every UK aircraft over the last 50 years. Harris has also developed innovative solutions to address the emerging need for small platform stores carriage and release as well as multi-station carriage.

Harris supports 26 operational precision approach radars in the UK, Cyprus and the Falkland Islands.

## AIR TRAFFIC MANAGEMENT

Harris' solutions connect systems and operations across regions to provide secure, scalable air traffic growth. They improve communications, reduce carbon emissions and increase situational awareness.

Harris provides voice communications and airport optimization solutions for NATS, the Air Navigation Service Provider of the UK.

- Telecommunications Infrastructure and Services
- Voice Communication Systems
- System Wide Information Management
- Airport and Airline Operations Management

## GEOSPATIAL SOLUTIONS

Harris provides geospatially-based analytics, insights and answers with automated tools that make sense of geospatial data overloads. As the leader in image science, Harris' scientifically-proven ENVI® analytics software can be used to extract actionable information from geospatial data while our custom data solutions are developed to meet mission-specific requirements. Harris' Geiger-mode LiDAR sensor collects high-resolution data faster and more cost effectively than traditional sensors.

- Nationwide Mapping (LiDAR)
- Geospatial Analytics
- Custom Geospatial Software Solutions
